# Laboratorium 3

Hibernate

1, Konfigurowanie Apache derby

2. Klasa Product

```java
@Entity
public class Product {
    @Id
    @GeneratedValue( strategy = GenerationType.AUTO)
    private int ProductID;

    private String ProductName;

    private int UnitsOnStock;

    public Product(){

    }

    public Product(String productName, int unitsOnStock){
        this.ProductName = productName;
        this.UnitsOnStock = unitsOnStock;
    }

    public Product(String productName){
        this.ProductName = productName;
        this.UnitsOnStock = 0;
    }
}
```
